Identity

'98 Aloha White Widow / Pua Mana Pakalolo. The identity described here refers to the combination of name and breeder in the source, not to authentication of a physical sample.

Description

'98 Aloha White Widow is presented as a particular White Widow selection, not a new cross with a known second parent. Pua Mana Pakalolo's account places it on Hawaii's Big Island in 1998 and highlights a resinous appearance and a hash-like sensory character. The database classifies it as mostly indica. [S1]

This history is a breeder attribution, not a chain of custody for HHH material. The description also refers to a clonally preserved cut, while the same page's summary mentions feminized seeds. That contradiction remains unresolved: this record establishes neither an available material format nor equivalence between possible materials sharing the name.

History and origin

The breeder's account connects the cut with White Widow and Hawaii's Big Island in 1998. Independent physical traceability is not supplied. [S1]

Recorded lineage

Selection of: White Widow [S1]. Parentage attributed to the source, not independently validated genetics.
