Identity, history and description

Identity

AK-47 XL / Divine Seeds. The identity described here refers to the combination of name and breeder in the source, not to authentication of a physical sample.

Description

AK-47 XL is an entry attributed to Divine Seeds. Sativa-dominant hybrid. Partial ancestry: AK47 × Brazilian sativa. [S1]

The attributed profile combines citrus, spice, musk, pine. [S1] Long leaves, strong branches and conical flowers. [S1]

History and origin

Divine Seeds states that Brazilian sativa ancestry was added to AK47 for its XL version. The tree only represents an XL expression of AK47 and omits that contribution. The breeder account is retained as partial and the discrepancy remains visible without inventing a name for the Brazilian line. [S1]

Recorded lineage

Partial ancestry: AK47 × Brazilian sativa [S1]. Parentage attributed to the source, not independently validated genetics.
