Grow Culture Genetics

BLOCK 011 / 100 - REVIEW PENDING

Provisional artwork A-S1; no human approval

Alliumz belongs to the catalogue of Grow Culture Genetics. Indica/sativa hybrid. [S1]

# Identity, history and description

Attributions are separate from verified information. The material is not certified.

## Identity

Alliumz / Grow Culture Genetics. The identity described here refers to the combination of name and breeder in the source, not to authentication of a physical sample.

## Description

Grow Culture Genetics attributes Alliumz to Velvet Moon #3 and reversed Garlicane S1 as pollen donor. It describes strong branching and abundant trichomes. The regular-seed label does not clearly fit that reversal account; the discrepancy is retained rather than resolved by assumption. Garlic aroma is not inferred from the name. [S1]

## History and origin
