Alpha Dawg belongs to the catalogue of Alphakronik Genes. Indica-dominant. [S1]

Identity, history and description

Attributions are separate from verified information. The material is not certified.

Identity

Alpha Dawg / Alphakronik Genes. The identity described here refers to the combination of name and breeder in the source, not to authentication of a physical sample.

Description

Alphakronik Genes attributes Alpha Dawg to the Chemdawg D cut crossed with Snowdawg BX. Its account explains the project through parental traits such as strong scent and resin, without an independent measurement of the offspring. Those parental references are not converted into guaranteed results for this selection. [S1]
