Provisional artwork A-S1; no human approval

Banners Revenge belongs to the catalogue of Dark Horse Genetics. Sativa-leaning hybrid. [S1]

Identity, history and description

Attributions are separate from verified information. The material is not certified.

Identity

Banners Revenge / Dark Horse Genetics. The identity described here refers to the combination of name and breeder in the source, not to authentication of a physical sample.

Description

SeedFinder records Dark Horse Genetics' Banners Revenge as a sativa-leaning hybrid. Its tree joins Bruce Banner #3 with Grimace OG and develops the latter parent as Purple Urkel x Face/Off OG BX1. The breeder-attributed description presents an F1 mixture and anticipates varied Purps, OG and strawberry expressions. That expectation does not establish a uniform aroma or analytical findings for the offspring. Promotional claims and the original text's personal dispute are omitted. Purple strawberry banner is descriptive wording in that source, not a confirmed alias. [S1]
