

Black Magic

Wizard Trees · Clone Only

Wizard Trees Black Magic: a Clone Only selection with a Candy & Gas reading.

Conceptual illustrations, not photographs of authenticated specimens. No medical claims or potency or availability guarantees.

Description

Black Magic is listed by Wizard Trees as a Clone Only selection. The brand presents it as a distinct in-house piece focused on resin production, colorful swollen calyx appeal and a Candy & Gas aromatic lane. No verifiable public parentage is published, so this dossier keeps the lineage as Clone Only and separates the cut identity from undocumented crosses.

The reviewed public documentation confirms Black Magic within the Wizard Trees family, but does not provide a selection date or parents. It also appears as a parent in newer Wizard Trees crosses such as Black Light, reinforcing its role as a base cut in the catalogue.

Quick facts

Name	Black Magic
Breeder / seed bank	Wizard Trees
Aliases	Blackmagic, Black Magic Wizard Treez
Recorded type	Clone-only selection
Lineage	Clone Only
Cut	Not authenticated through an HHH sample
THC / CBD	Not documented as an HHH value
Terpenes	No HHH analysis

The dossier separates documented data, commercial context and sensory reading. No HHH sample or laboratory analysis linked to these entries has been supplied.

Sensory

Dark candy, gas and resin are the documented sensory anchors. No measured terpenes or percentages are assigned without a COA for a specific sample.

Terpenes

No measured terpenes are assigned. Source aroma notes are orientative and do not establish chemical composition.
