Identity, history and description

Identity

(GG#4 x BlissfulWizard) x Do-Si-Dos F2 / Grandiflora Genetics. The identity described here refers to the combination of name and breeder in the source, not to authentication of a physical sample.

Description

(GG#4 x BlissfulWizard) x Do-Si-Dos F2 retains the structure of its parentage in its name: GG#4 and BlissfulWizard form one branch, crossed with the Do-Si-Dos F2 parent. The record attributes the work to Midwest Best at Grandiflora Genetics. F2 belongs to Do-Si-Dos in the tree, not to an established generation of the entire combination. [S1]

Its documentary identity is better defined than its physical characteristics. The source does not determine an indica/sativa type or supply a specific aromatic or morphological profile. Traits associated with ancestral names are therefore not automatically transferred to the descendant. The record identifies a genealogical combination without certifying a uniform phenotype, chemical composition or HHH specimen.
