Identity, history and description

Identity

(HTC DC x Skunk) x Deep Chunk / B. Seeds Co.. The identity described here refers to the combination of name and breeder in the source, not to authentication of a physical sample.

Description

(HTC DC x Skunk) x Deep Chunk preserves two Deep Chunk-related branches in its name. B. Seeds Co. attributes the maternal branch to a selection from Hill Temple Collective Deep Chunk x Skunk seeds received from Demian; the other branch is identified as Deep Chunk #17. The catalogue classifies it as an indica/sativa hybrid without publishing a ratio. [S1]

The description's aromatic reference is "Old School" and belongs to the mother. It does not specify notes that would establish a detailed aromatic profile for the descendants. The text expresses expectations about the cross, not independent verification of every specimen. Its identity rests on recorded provenance and grouped parentage rather than demonstrated uniform potency or morphology.
