Lime Light

Wizard Trees · Gelonade x Zangria

Lime Light, also Limelight, by Wizard Trees: Gelonade x Zangria.

Conceptual illustrations, not photographs of authenticated specimens. No medical claims or potency or availability guarantees.

Description

Lime Light is normalized here with its public alias Limelight. Wizard Trees lists it as Gelonade x Zangria, and SeedFinder preserves the same genealogy under Wizard Trees. The documented sensory reading turns around lime, lemon, fizzy citrus and a green pine undertone, without turning batch values into general guarantees.

Limelight appears in the official catalogue as one of the parents of Black Light alongside Black Magic. That position frames it as a key citrus cut in Wizard Trees' recent line.

Quick facts

Name	Lime Light
Breeder / seed bank	Wizard Trees
Aliases	Limelight, LimeLight, Lime Light Wizard Treez
Recorded type	Feminized hybrid / flower cut context
Lineage	Gelonade x Zangria
Cut	Not authenticated through an HHH sample
THC / CBD	Not documented as an HHH value
Terpenes	No HHH analysis

The dossier separates documented data, commercial context and sensory reading. No HHH sample or laboratory analysis linked to these entries has been supplied.

Sensory

Soda-like lime, lemon, bright citrus and pine form the documentary profile. No HHH COA is attached to this dossier.

Terpenes

No measured terpenes are assigned. Source aroma notes are orientative and do not establish chemical composition.
