Identity, history and description

Attributions are separate from verified information. The material is not certified.

Identity

(OG X Sour Diesel) X Durban / Ganja Rebel Seeds. The identity described here refers to the combination of name and breeder in the source, not to authentication of a physical sample.

Description

(OG X Sour Diesel) X Durban abbreviates an entry whose published genealogy specifies SFV OG x Sour Diesel IBL F2 as the first branch and Durban as the second. Ganja Rebel Seeds presents it as an F1 indica/sativa hybrid. F2 belongs to the Sour Diesel component in the formula; it does not replace the F1 generation attributed to the complete cross. [S1]

The breeder distinguishes the maternal plants' pine, lemon and pungent aromatic references from the descendants' account: mostly sweet with some "funk" and variation between expressions. Large resinous flowers are also described. These are catalogue attributions, not measurements of an HHH sample or guarantees that every specimen shares the same appearance or composition.

History and origin

Ganja Rebel Seeds entry described as F1 and linked to two maternal selections; creation date undocumented. [S1]

Recorded lineage

(SFV OG x Sour Diesel IBL F2) x Durban [S1]. Parentage attributed to the source, not independently validated genetics.
